+ How it Works

1

UTI **Early Employment Program** helps raise awareness of your company and possible career paths with you, as well as the hiring incentives you offer to prospective students early in the education enrollment process using your branded materials.

2

UTI sends you applications and you screen and interview student applicants for part-time employment when they begin their education – **minimizing the highly competitive talent recruitment process.**

3

You nurture and vet the student employee while they are in school and working for you. Upon graduation from UTI, you may offer them a full-time role – **eliminating the recruitment process.**
